```csharp
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;

namespace command_line
{
    class Program
    {
        static void Main(string[] args)
        {
          string name;

        if (args.Length == 0)
        {
            System.Console.WriteLine("No argurments specified ");
            name = System.Console.ReadLine();
            System.Console.WriteLine("Name =" + "  " + name);
            return;
        }
        else
        {
            foreach (string str in args)
                Console.WriteLine(str);

        }
        }
    }
}
```
